

BED BUGS CONTROL CLIENT PREPARATION INFORMATION

For our company to provide the most effective service possible, we ask that before our arrival you review and complete all necessary steps listed below. One of our technicians will verify completion upon arrival. If you fail to complete the following requests, it may delay the treatment and potentially void any guarantee if applicable. The Appalachian Pest Control technician may provide additional preparation instructions based on infestation level.

- Remove all bedding and pillows, place in bags and take to the laundry room only when they can be placed directly into the washing machine using hot water and / or placed into a dryer.
- Vacuum the floor extensively. Remove the vacuum bag immediately and discard it in an exterior garage receptacle.
- Articles under the beds provide an ideal place for bedbugs to hide. All clothing or garments loose around the room must be bagged and laundered/ All other objects that were previously stored under the bed should not be moved as bedbugs may be relocated to other areas of the structure.
- Clothing within bedside nightstands or otherwise stored close to beds should be bagged and laundered.
- It is necessary for you and your pets to vacate the premises during the service and to not re-enter until at least 8 hours after treatment. Fish aquariums may be left on side, however, they should be covered, and air filters must be disconnected. Persons with underlying health conditions should consult their family physician where they have concerns regarding re-entry time.

Laundry Directions:

It is necessary that all garments be laundered in hot water or placed into a dryer on the highest setting for a minimum of 30 minutes. All laundered items must remain out of the treatment areas during the service.

Additional Instructions/Notes:
